SEE OWNER'S MANUAL BX-29

A LOOK INSIDE BARRACUDA'S NEW FASTBACK!

Barracuda's Fastback still gives you a choice of rear seat up . . . or rear seat down! You can haul extra passengers or extra luggage . . . it's up to you . . . and it's easier to flip that rear seat-back down and back up this year!

Here's how to mix business with pleasure! Barracuda's business-like gauges and steering wheel help make driving more fun. The three big dials include the speedometer (with trip odometer), a performance gauge (vacuum gauge) . . . or a tachometer . . . and gauges for the alternator, engine temperature, oil

pressure and fuel supply. And when you're on the open road, you know that that steering wheel will give you the type of steering and handling response you have learned to expect from a Barracuda. It's all business . . . and that's what makes it so much fun to drive!

Here's a view of a Barracuda that's hard to resist! Optional front bucket seats (std. on Convertible), deeply foam-padded for softness and shell-contoured to cradle passengers in easy-chair comfort! Rich, leather-like vinyl upholstery has pleated seat inserts for cooler seating and a more luxurious appearance.

Barracuda's optional console, shown with a 4-speed shifter, is available only with bucket seats and with either TorqueFlite or 4-speed manual transmissions. Completely framed in chrome at the top, the optional console features a large, concealed storage compartment, and an ashtray.

Utility Compartment behind rear seat is retained in '67 Fastback . . . big as ever and carpet-lined for luxury. Side panels have beautiful vinyl covering. Courtesy light above rear seat-back can be seen through slimmer rear window.

Barracuda Trunk is clean and uncluttered . . . has full-width room for luggage. Low sill height makes for easy loading and unloading. Forward wall is a hinged security panel that can be lowered to connect trunk with utility compartment behind rear seat. Security panel can be unlatched only from the trunk side. Load space is over seven feet long with the security panel and the rear seat-back lowered. Spare tire is again stored beneath the trunk floor.

Barracuda's Formula "S" Package is better than ever. It is designed to transform your Barracuda into a hard-charging road and track car with superb handling and cornering characteristics.

Here's what you get:

- Commando 273 V-8 high-performance engine
- Heavy-duty front torsion bars and rear leaf springs
- Anti-sway bar

- Heavy-duty, one-inch shock absorbers
 - D70 x 14", Red Streak tires†
 - 5.5" J Rim Wheels
 - Front fender Formula "S" medallions
- † Red Streak tires are high-speed, low-profile tires with good wet-road adhesion and excellent cornering abilities that result from the low cord angle.

NOTE: TorqueFlite automatic or four-speed manual transmission required with Formula "S" Package.

FORMULA "S" PACKAGE WITH COMMANDO 383 V-8

When ordering the Commando 383 engine, which is available only with the optional Formula "S" Package, the following additional equipment is included:

- Dual exhausts
- "383 Four Barrel" plaques on Barracuda front fenders

NOTE: Front wheel disc brakes are required.

NEW DECOR TRIM PACKAGE

This optional trim package features wood-grained trim across the instrument panel and door interior panels, bright metal frames for the brake pedal, accelerator and clutch pedal (with manual transmissions), a special Rallye speedometer and rear-seat armrests with ashtrays.

OTHER EXCITING FEATURES FOR THE '67 BARRACUDA:

- Mag-style wheel covers
- Bolt-on wheel covers with sporty chrome-plated wheel lug nuts
- Racing stripes • Firm-ride shock absorbers • Fast-ratio manual steering
- Silent-flow ventilation system with outlets in doors (standard)
- Sure-Grip differential • Part-throttle kickdown with TorqueFlite Six
- Front wheel disc brakes • Pit stop gas cap (std.) and many other features

BARRACUDA GETS COMMANDO 383 V-8 FOR '67!

For those of you who asked for it . . . here it is: the Commando 383 V-8! Big and brawny, and boasting 400 pound-feet of wheel-churning torque, the Commando 383 will give your Barracuda blast-off acceleration from a standing start and it just doesn't let up! This new 280-horsepower Barracuda powerplant option is available only with the optional Formula "S" package and requires front-wheel disc brakes.

Other Barracuda V-8's include the optional 235-hp. Commando 273 with four-barrel carburetor and the standard 180-hp. 2-barrel carburetor version that uses regular gasoline.
