

APA Literature Review Research Paper, 6th ed.

A Critical Summary of What Scientific Literature Says About a Specific Topic

(a Non-APA Experimental Report Research Paper)

The following are only highlights of what should be done in your paper, you are expected to refer to your APA manual for details

“Main Concepts / Definition of APA”

- * Place your thoughts/research in an **organized and structured** fashion. (ie outline)
- * Express author’s views by collecting similar research and **comparing and/or contrasting** it in your paper. (ie talk show)
- * Give **credit where credit is due**. Provide proper citations and references. ie (Butler, YEAR)

Be Enthusiastic About Your Topic

...and “Run With It”

“Main Pages/Areas of the Manuscript”

Title “Page”

Abstract “Page”

Text “Body of the Paper”

Reference “Page”

Figure “Page”

“Headings”

- **Much like an outline (ie textbooks)**
ie (I, II, III, A,B,C, 1.,2.,3., etc...)
- **Headings function as an “outline”**
to reveal a paper’s organization
- **Avoid only having (1) “subsection”**
heading (exception Level 3)
- **The number of levels of headings needed**
will depend on its length and
complexity.

- I. AGRICULTURE COMPARED TO HUNTING-GATHERING
 - A. Advantages of Agriculture
 - 1. More efficient use of land
 - a. agriculture: 1 sq km supports 50 people
 - b. hunting-gathering: 25-30 sq km support 5-6 people
 - 2. More stable food source through year (with storage)
 - 3. More free time in non-critical seasons
 - B. Disadvantages of Agriculture
 - 1. Malnourishment
 - a. farmers often deficient in protein
 - 2. Labor intensive in critical seasons
 - 3. High risk if crops/herds fail
- II. IDENTIFYING DOMESTICATES IN ARCHAEOLOGICAL RECORD
 - A. Plants
 - 1. Seeds are bigger in size
 - a. example: teosinte to maize
 - b. example: domesticated sunflower is at least 5 mm
 - 2. Seed coats are thicker
 - 3. Found outside natural range of distribution
 - B. Animals
 - 1. Horns change in morphology
 - a. example: sheep
 - 2. Body size changes
 - 3. Changes in coat or fur
 - 4. Age-sex distributions in skeletal collections
 - a. few old males
 - b. many slaughtered young males
 - c. many old females
 - 5. Found outside natural range of distribution

“Construction of Headers”

Floaters:

- **No single word or lines should “float” at the bottom or top of a page**
- **Extend those words or lines onto or before the next page if necessary**
- **This includes URL’s on reference page; place a space within the URL to separate**

Line Length and Alignment:

- **Length of a single line is to be about 17 cm’s (6 ½ inches)**
- **Do “not” right justify**

Boldface:

- Only “boldface” within the body of the paper (ie. headers)
- Not: Title Page, and the words Abstract, References, Appendix

Seriations:

- **To indicate seriations within a sentence/paragraph, use lower case letters with parentheses:**

ie.

... consider that DNA is (a) found in the nucleus of eukaryotes, (b) found on cell membranes, and (c) found in the mitochondria (mtDNA).

- **To indicate seriation in separate paragraphs or sections (ie. itemize list or steps), number each paragraph, followed by a period but not enclosed in or followed by parenthesis: (best used if the seriations need to include more detail/information).**

ie.

1. Begin with a paragraph indent. Type the second and succeeding lines flush left. Consider DNA found in the nucleus of eukaryotes and what impact

2. The second item begins a new paragraph. This type of seriation is in paragraph form. DNA found on cell membranes can be used as a way for cells

3. The third item begins a new paragraph. This type of seriation is in paragraph form. DNA is also found in mitochondria as

Spelling / Grammar:

- Words are to be correctly spelled.
- Do not use a hyphen unless it serves a purpose.
- Do not use a hyphen at the end of a line.

 - may cite/ref sentence(s); however, not necessary if you’re referring to the quote

Metric:

- All papers are to use metric
- Metric abbreviations are fine

Corrections:

- Fix all errors using a “black pen”
- Limit 3 errors corrected as previously mentioned per page; otherwise, re-type

No Plagiarism:

- Use your own words (proves that you’ve digested and understood the topic)
- If you “lift” or “cut/paste” someone else's work and still reference/cite the information, information is still considered plagiarism - DO NOT DO !
- read the sources then close the resource and explain the info in your own words
- If you do use a resource in verbatim, place quotes (“ ”) around the information
- Nice resource on plagiarism: <http://plagiarism.org/citing-sources/how-to-paraphrase>

<p>Often students are spending most of their time on the computer searching for information on a topic. Little time is being spent on preparation and planning for what they are searching for, which results in ineffectual findings.</p>	<p>In order to find information effectively, students should spend most of their time planning what they are searching for by creating word webs or concept maps on their topic. Effective searching is done when most of the planning, analyzing, and keyword refining is done away from the computer.</p>
